

# OpCenter

## Team Asset for Test, Training, and Experimentation

### OpCenter

- New 30,000 sq ft building for improved “one-stop” customer support using co-located test management, planning, scheduling, ops control, data presentation, and data delivery
- Re-configurable control rooms to integrate and control live assets with simulations from laboratories and ranges throughout the Team, Fleet, and beyond
- Distributed team coordination with networked meeting rooms, remote displays, and distributed resource scheduling
- Consolidation of Range functions and personnel

### Status

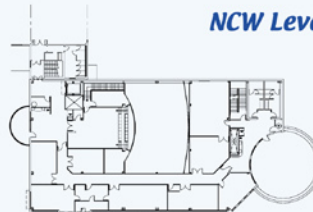

- Construction is under way
- Estimated completion: Summer 2003

*Range Operations Center Addition  
Naval Air Station, Point Mugu, California*

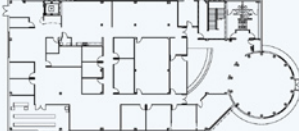

*NCW Level*
